

Classification Evaluation Report

Executive Summary

This report summarizes the performance of a multiclass digit classification model.

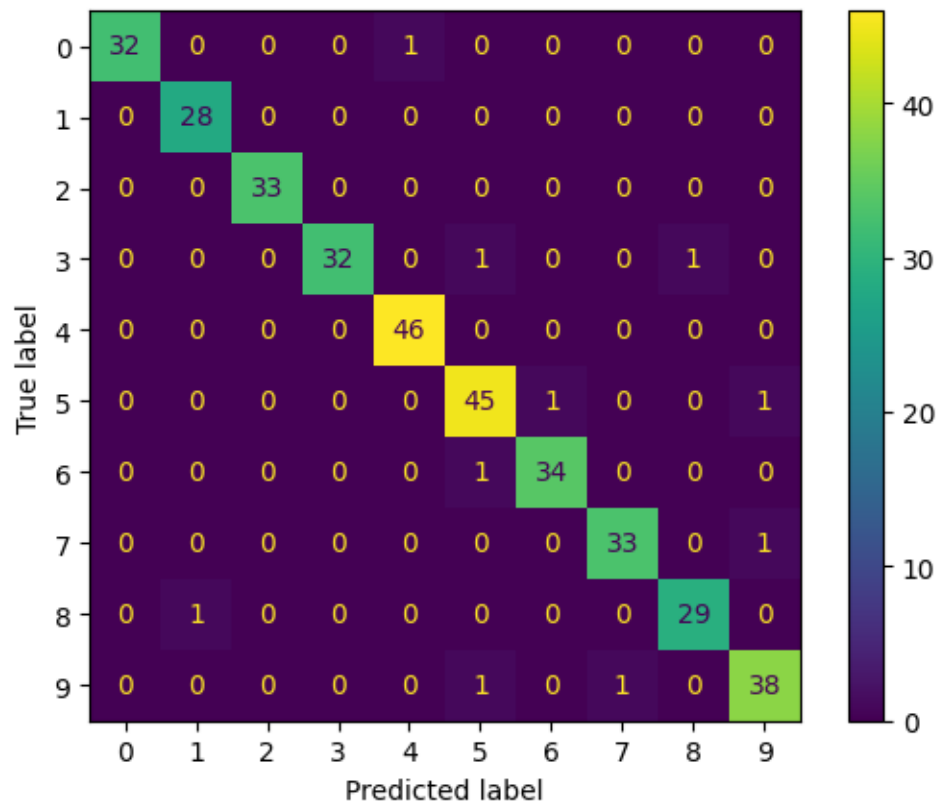

Overall Metrics

	Metric	Value
0	Accuracy	0.972
1	Precision	0.973
2	Recall	0.972
3	F1 Score	0.972

Key Findings

The model demonstrates strong overall performance with only a small number of misclassifications.

Confusion Matrix

Per-Class Metrics

	precision	recall	f1-score	support
0	1.000	0.970	0.985	33.0
1	0.966	1.000	0.982	28.0
2	1.000	1.000	1.000	33.0
3	1.000	0.941	0.970	34.0
4	0.979	1.000	0.989	46.0
5	0.938	0.957	0.947	47.0
6	0.971	0.971	0.971	35.0
7	0.971	0.971	0.971	34.0
8	0.967	0.967	0.967	30.0
9	0.950	0.950	0.950	40.0

Conclusion

This evaluation demonstrates that:

- The model achieves strong overall classification performance.
- Confusion matrix analysis reveals specific class-level mistakes.
- Aggregate metrics alone do not fully capture model behavior.
- Automated reporting combines quantitative metrics and qualitative insights.
